## **Critique and Limitations of Building Embedded Linux Systems**

While *Building Embedded Linux Systems* provides useful insights, it is not without its weaknesses. One of the primary limitations noted in the paper is the limited scope of the research, which may affect the universality of the findings. Additionally, certain assumptions may have influenced the results, which the authors acknowledge and discuss within the context of their research. The paper also notes that expanded studies are needed to address these limitations and investigate the findings in different contexts. These critiques are valuable for understanding the context of the research and can guide future work in the field. Despite these limitations, *Building Embedded Linux Systems* remains a critical contribution to the area.
